

ANITESH KUMAR SHAW

Quality Engineering Leader | AI-Driven QA & Test Automation Architecture | 18+ Years

Tampa, FL | (973) 641-4269 | emailanitesh@gmail.com | linkedin.com/in/aniteshshaw | aniteshshaw.github.io

EXECUTIVE SUMMARY

Quality engineering leader with 18+ years directing QA strategy, test automation architecture, and engineering teams for Fortune 500 clients across logistics, financial services, and professional services. Pioneer in applying agentic AI to quality engineering: designed and deployed QIS, an MCP-powered AI workflow adopted across development and QE organizations, cutting test analysis and design effort 60–70%. Lead a 30+ member global QA organization; shortened enterprise release cycles from 6 weeks to 2. Recognized with an enterprise Technology Innovation Award and hackathon win for AI-driven engineering tools. Seeking to lead quality engineering and AI-enabled engineering productivity at scale.

CORE COMPETENCIES

- Quality Engineering Strategy
- Test Automation Architecture (Playwright, Selenium, API)
- Agentic AI skills & MCP Workflows
- GitHub Copilot Extensibility
- Team Leadership (30+ engineers, US/India)
- CI/CD & Shift-Left Governance (Azure DevOps)
- ETL & Data Migration QA
- Performance Testing (JMeter)
- RPA (UiPath)
- Power BI Quality Dashboards & KPI Governance
- Accessibility (DHS Trusted Tester, WCAG/Section 508)
- UAT & Release Management

PROFESSIONAL EXPERIENCE

TATA CONSULTANCY SERVICES (TCS) Jan 2007 – Present

Progressive QA leadership career serving Fortune 500 clients in the US and India. Current title: QA Technical Architect.

QA Technical Architect — Total Quality Logistics (TQL), Cincinnati, OH (remote from Tampa) Feb 2023 – Present

Leading quality engineering for a top North American freight brokerage modernizing legacy systems to cloud-based architecture. Logistics domain.

- **Lead a 30+ member global QA organization (US & India)**, owning test strategy, automation architecture, hiring input, mentoring, and cross-team engineering standards.
- **Built QIS (QA Intelligence System)**, an MCP-driven agentic AI workflow — custom agents, reusable AI skills, and spec kits built on GitHub Copilot extensibility — standardizing story analysis, risk modeling, test design, and PR validation; reduced analysis/design effort 60–70% and drove adoption across Dev and QE squads.
- **Shortened release cycles from 6 weeks to 2 weeks** (2 installs/week) through automation architecture, readiness dashboards, and shift-left governance — enabling 5+ additional deployments in 2025 and 12 projected in 2026.
- **Integrated Datadog RUM into test generation**, deriving automated test scenarios from real user flows with Core Web Vitals as pass/fail quality gates.
- **Built the iADD service dependency & readiness dashboard**, cutting false defect reports 70–75% and saving 4–6 hours of investigation per incident; first version delivered in under one week.
- **Engineered LM Quick Installer** (PowerShell-based environment provisioning), reducing setup time from 25 minutes to 2–3 minutes (~90%) and eliminating onboarding delays.
- **Directed ETL QA for the Great Plains → Oracle migration** using Boomi, ensuring data accuracy and multi-system consistency.
- **Won internal AI hackathon** with AlssueBotExpress, an AI defect-triage agent that auto-summarizes issues and identifies probable root cause; received the enterprise Technology Innovation Award.
- **Delivered leadership visibility** via Power BI dashboards for defect trends, readiness KPIs, and release quality; maintained ~98% CSI in FY25–26 with zero escalations.

- **Evangelized AI-driven engineering** through All Hands, TechTrek, and Lunch & Learn sessions on MCP workflows, agentic QA, and automation strategy.

QA Architect & BI Reporting Lead — KPMG Global, Montvale, NJ & Kolkata, India 2018 – Feb 2023

E-learning, innovation, and audit technology programs.

- **Managed a 25+ member QA team across multiple locations**, owning UAT planning, test design, and defect management for enterprise learning platforms.
- **Spearheaded AIVideoTranscriber**, an AI video-to-text transcription tool using Azure Cognitive Services and embeddings to improve content accessibility and searchability.
- **Led ETL testing for large-scale data migrations**, validating transformations and data quality end to end.
- **Conducted accessibility compliance testing** (WCAG, ADA, Section 508) as a DHS-certified Trusted Tester.

Senior QA Lead & Scrum Master — KPMG US, Seal Beach, CA & Montvale, NJ 2015 – 2018

- **Delivered multiple concurrent QA projects** for enterprise mobility and advisory platforms; drove automation strategy for previously manual processes and ran sprint ceremonies, triage, and release validation.

QA Lead, Analyst & Application SME — Citibank, O'Fallon, MO & Kolkata, India 2009 – 2015

- **Led testing for a Real Estate Lending portfolio for 5+ years**, including 4 years onsite in the US as consultant and application SME; co-founded the client's Testing Center of Excellence and served on its Analysis & Planning leadership team.

Application Developer — British Telecom, Kolkata, India 2007 – 2009

- **Developed back-end components** (PL/SQL packages and procedures), data models, and technical design documentation for telecom applications.

INDEPENDENT PROJECTS & OPEN SOURCE

- **QIS-Skills (open source)**: reusable agentic AI skills framework for quality engineering — <https://github.com/aniteshshaw/QIS-Skills>
- **A2Quest (EdTech) & Bhaktiverse (content platform)**: designed, built, and shipped full-stack products end to end (Supabase, Netlify, AI APIs), demonstrating hands-on product delivery beyond enterprise QA.
- **Published writer on AI engineering**: Medium article on AgentOps telemetry — architecting observability for AI coding agents via lifecycle hooks and privacy-first schemas.

CERTIFICATIONS

- GitHub Copilot (GH-300), Azure AI Fundamentals (AI-900) & Azure Fundamentals (AZ-900) — Microsoft
- Generative AI Fundamentals — Databricks
- Professional Scrum Master I & II — Scrum.org
- DHS Trusted Tester (TT-2203-02564) — U.S. Dept. of Homeland Security
- ISTQB Certified Tester, Foundation Level · Lean Six Sigma Yellow Belt

EDUCATION

Bachelor of Engineering, Electrical Engineering 2003 – 2007

Bengal Engineering and Science University (now IEST), Shibpur, India
